PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

* Please keep this manual in a safe place for future reference.

English

WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Do not open

- Do not open the device or attempt to disassemble the internal parts or modify them in any way. The device contains no user-serviceable parts. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning

- Do not expose the device to rain, use it near water or in damp or wet conditions, or place containers on it containing liquids which might spill into any openings. If any liquid such as water seeps into the device, have the device inspected by qualified Yamaha service personnel.

CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the device or other property. These precautions include, but are not limited to, the following:

Location

- If you intend to use the pole socket on the subwoofer for mounting a full range speaker, please read carefully "Precautions for Pole Mounting" on page 4. Failing to observe these precautions may cause the device to fall, and result in injury or damage to the internal components.
- Always consult qualified Yamaha service personnel if the device installation requires construction work, and make sure to observe the following precautions.
 - Choose mounting hardware and an installation location that can support the weight of the device.
 - Avoid locations that are exposed to constant vibration.
 - Make sure to use the specified hardware.
 - Inspect the device periodically.

- When transporting or moving the device, always use two or more people. Attempting to lift the device by yourself may damage your back, result in other injury, or cause damage to the device itself.
- Before moving the device, remove all connected cables.
- Do not use the speaker's handles for suspended installation. Doing so can result in damage or injury.
- Do not expose the device to excessive dust or vibration, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day) to prevent the possibility of distortion or damage to the components.
- Do not place the device in an unstable position (for example, on a shaky table or on an incline) where it might accidentally fall over.

Connections

- Before connecting the device to other devices, turn off the power for all devices. Before turning the power on or off for all devices, set all volume levels to minimum.
- Use only speaker cables for connecting speakers to the speaker jacks. Use of other types of cables may result in fire.
- Make sure to connect and neatly tie up the speaker cable so that the cable is not exposed to being tripped over, stepped on or inadvertently pulled. Also avoid pinching the cable (for example, between a heavy object and the floor). Improper handling can result in damage to the device, personal injury or fire as well as electrical shock hazard.

Special Notice

The rubber feet included in this package can be attached to the speaker to prevent it from sliding when it is used on a slippery surface or if the speaker cabinet moves by vibration at a high volume. See "Dimensions" (page 29).

Handling caution

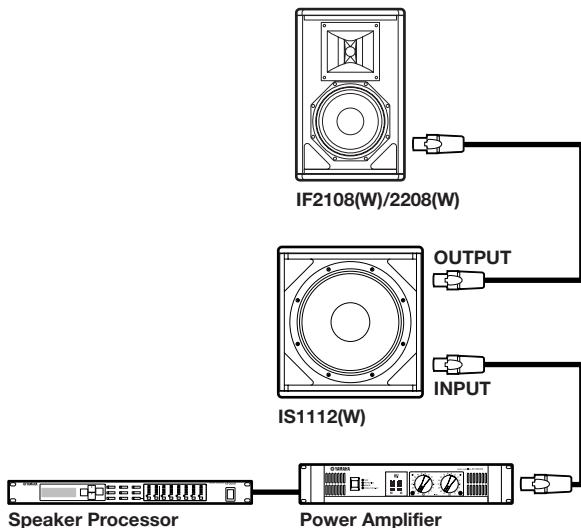

- Do not apply excessive input.
To prevent possible damage to the speakers or even fire, make sure to immediately lower the input level in the following cases.
 - Feedback caused when using a microphone.
 - Continuous high sound level produced by electronic instruments.
 - Popping noises caused by turning on other equipment, or by connecting or disconnecting system components while the amplifier is turned on.
 - Continuous high-power output of distorted signals.*
- *The device may be damaged even when the output level of the power amplifier is lower than the specified permissible input level, if distorted signals are continuously output at high power.
- When turning on the AC power in your audio system, always turn on the power amplifier LAST, to avoid speaker damage. When turning the power off, the power amplifier should be turned off FIRST for the same reason.
- Do not operate this device for a long period of time at high volume levels or at a level that is uncomfortable, since it is capable of producing sound levels that could cause permanent hearing loss. If you experience any discomfort or ringing in the ears, or suspect an hearing loss, you should consult an audiologist.
- Do not stand on the device or put your feet on it, and do not hang it from the ceiling or any high place. Improper handling can result in damage to the device or even personal injury.

If you notice any abnormality

- If any unusual smell or smoke appears to be emitted from the device or caused by it, or if there is a sudden loss of sound during use, or if the device is dropped or damaged, discontinue using it immediately and have it inspected by qualified Yamaha service personnel.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the device.

Connections

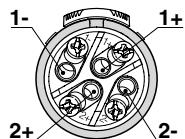

Neutrik Speakon NL4 plug wiring

Connect the plugs as shown below.

⚠ CAUTION

Be sure to use proper speaker cable – not shielded instrument or line cable – for all speaker connections.

NL4 plug	INPUT	OUTPUT
1 +/-	SUBWOOFER	FULL RANGE
2 +/-	FULL RANGE	UNUSED

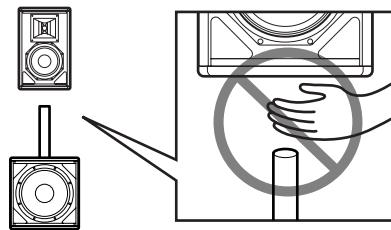

NOTE The Speakon jack 1+/- of INPUT side at the speaker and barrier strip terminals should be connected in parallel. For details, see the wiring diagram on page 29.

Precautions for Pole Mounting

A full-range speaker system can be attached to the IS1112(W) by inserting a pole to the pole socket of the sub-woofer. When you use a pole mount, please keep in mind the following points:

- Improper handling can result in damage to the speaker or even personal injury.
- Full-range speakers that can be mounted to the IS1112(W) are IF2108(W) and IF2208(W).
- Use a pole no longer than 90cm (35.4") with an outer diameter of 35mm (1-3/8").
- When pole mounting a speaker cabinet, always use two or more people.

- When pole mounting a speaker cabinet, avoid inserting your fingers or hands between the pole socket and pole.

- Make sure to keep the speaker cabinet steady with your hands until the pole is firmly and completely inserted into the pole socket.

Suspended Installation

⚠ CAUTION

- The strength of the suspension points on the speaker is **60 kg** per point (maximum).
- Before doing any installation or construction work, consult with an installation expert.
- When choosing the installation location, suspension wire and mounting hardware, make sure all are strong enough to support the weight of the speaker.
- Some fittings may deteriorate over extended periods of time due to wear and/or corrosion. For optimum safety, the installation should be checked thoroughly at regular intervals.

Yamaha cannot be held responsible for damage or injury caused by insufficient strength of the support structure or improper installation.

Using eye bolts for suspension

For optimum safety, make sure to carefully follow the precautions below.

⚠ CAUTION

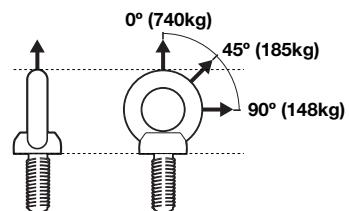

- Use only the supplied eye bolts.
- Use three or more eye bolts for suspended installations.
- Install the eye bolts to multiple surfaces of the speaker, not just one surface.

Eye bolt strength

Keep in mind that the strength of the eye bolt differs depending on the suspension angle of the speaker. Make sure that the load for each eye bolt is less than 740 kg when suspending at an angle of 0 degrees, and less than 185 kg at an angle of 45 degrees.

⚠ CAUTION

When using the eye bolts, make sure that the suspension angle is within the range of 0 to 45 degrees, as shown at right.

⚠ CAUTION

Do not suspend the eye bolts as shown in the diagram at right.

Information for Users on Collection and Disposal of Old Equipment

This symbol on the products, packaging, and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling of old products, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC.

By disposing of these products correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

[For business users in the European Union]

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

[Information on Disposal in other Countries outside the European Union]

This symbol is only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Verbraucherinformation zur Sammlung und Entsorgung alter Elektrogeräte

Befindet sich dieses Symbol auf den Produkten, der Verpackung und/oder beiliegenden Unterlagen, so sollten benutzte elektrische Geräte nicht mit dem normalen Haushaltsabfall entsorgt werden.

In Übereinstimmung mit Ihren nationalen Bestimmungen und den Richtlinien 2002/96/EC, bringen Sie alte Geräte bitte zur fachgerechten Entsorgung, Wiederaufbereitung und Wiederverwendung zu den entsprechenden Sammelstellen.

Durch die fachgerechte Entsorgung der Elektrogeräte helfen Sie, wertvolle Ressourcen zu schützen und verhindern mögliche negative Auswirkungen auf die menschliche Gesundheit und die Umwelt, die andernfalls durch unsachgerechte Müllentsorgung auftreten könnten.

Für weitere Informationen zum Sammeln und Wiederaufbereiten alter Elektrogeräte, kontaktieren Sie bitte Ihre örtliche Stadt- oder Gemeindeverwaltung, Ihren Abfallentsorgungsdienst oder die Verkaufsstelle der Artikel.

[Information für geschäftliche Anwender in der Europäischen Union]

Wenn Sie Elektrogeräte ausrangieren möchten, kontaktieren Sie bitte Ihren Händler oder Zulieferer für weitere Informationen.
